10 New from \$44.86

In this work readers are introduced to a method of enhancing already existing networks that are not properly deployed and the preliminary issues to be considered before deploying a functional network. The primary objective of this work is to enhance the performance of an existing University Network (the Federal University of Technology Minna CAN at Gidan Kwano in this case) and to provide cheap remote access via a Virtual Private Network (VPN) to selected clients at the other satellite campus (i.e. Bosso Campus). This was achieved by carving out a baseline study of the present design, then
